

Dear Honored Guest,

The theme for 2015—*Engaging Communities. Empowering Victims.*—provides an opportunity to recommit ourselves to extending our reach through a victim-centered approach. By engaging community leaders and organizations in the work to support crime victims, we provide new avenues for victims and enhance our ability to serve them. When we better learn how to meet the needs of underserved victims—and help new communities understand the impact of victimization and the assistance that is available—we expand victims' options.
